Mr. John Choi
President
SavEnergy Inc.
120 Craft Avenue
Inwood, NY 11096

Dear Mr. Choi,

As the owner of a large and growing manufacturing company, I am constantly faced with the rising and increasingly unpredictable energy prices. In these trying times, any savings I can find is especially crucial for my business.

During recent plant upgrades, I was faced with the challenge of finding vendors who could provide superb service at a reasonable cost. When SavEnergy came to me with their energy cost savings plan that cost \$263,000, I was more than eager to implement it. With the installation of SavEnergy LED lights in two of our manufacturing plants, we have seen a 70% reduction in electric consumption and cost.

Needless to say, the investment I made with the SavEnergy program brought along several long term benefits. First of all, we will save on replacement Fluorescent and HID Lights since LED lights are guaranteed for 50,000 hours. Additional savings were found on the installation labor of new lights because ballasts are not required; the new technology requires none. Overall, our office and plant lighting is brighter, sharper and lights our open areas more clearly. LED lights also provide us the opportunity to become more environmentally conscious by using green technology. In turn, we are facilitating a safer and cleaner environment.

I greatly appreciate the services you provided and hope you are successful in marketing your LED products. My goal of improving the plant at a reasonable cost was surpassed. I now have upgraded facilities and will also benefit from long term savings.

Sincerely,

Joseph Sevioli
President & CEO
